

### Acumatic-600L

The magnetic lock is designed for wooden door, glass door, and steel door with the opening angle of 90°. The maximum thrust of the lock is 280 kg (600 Lbs).

# **Key Features**

- The magnetic lock supports static linear thrust of 280 kg (600 Lbs).
- It is applied to wooden door, glass door and metal door, etc...
- Anti-residual magnetism design.
- High strength material anodized aluminium housing.
- No mechanical failure, and the magnetic lock works by electromagnetism force.
- Durable and silence operation.
- Low power consumption with high efficiency.

## **Specifications**

Model	Acumatic-600L
Dimension of lock body (L × W × H)	250 mm × 48 mm × 26 mm
Dimension of armature plate (L $\times$ W $\times$ H)	180 mm × 38 mm × 11 mm
Maximum thrust	280 kg (600 Lbs) linear thrust
Input voltage	12 VDC
Working current	12 V/450 mA
Wire	5 Wires (NO/NC/COM/V+/V-)
Material	Aluminium alloy
Feature	Fail-safe: Power to lock
LED indicator	Red: Door is unlocked Green: Door is locked
Suitable door	Wooden door, glass door, metal door etc
Working temperature	-10 °C to 55 °C (14 °F to 131 °F)
Working humidity	0 to 95% (relative humidity)
Shell	Hard anodizing electroplating operated
Lock body	Eco-friendly Zinc with electroplating operated
Armature plate	Eco-friendly Zinc with electroplating operated
Weight	1.85 kg (4.1 Lbs)

#### **Installation Inside Frame**

- 1. Check off the contents and ensure you have the tools required.
- 2. Use the drill template to install the mounting bracket Item 1A inside the door frame.
- 3. Drill frame for cable entry and run cable for maglock.
- 4. Fit the maglock to the bracket using 2 Security Screws Item 1C.
- 5. Close the door and use the armature to mark the door for drilling.
- 6. Fit the Armature (thread lock on 8) to the door.
- 7. Make sure the Armature and mag lock are aligned.
- 8. Use spacer washers to get the Armature plate and Mag Lock to just touch.
- 9. Set the jumper to correct voltage, connect wiring and test.

### **Installation Above Door**

- 1. Check off the contents and ensure you have the tools required.
- 2. Use the drill template to install the L bracket Item 19 above the door.
- 3. Check the door still closes.
- 4. Remove Qty 2 screws and replace with counter sink screws.
- 5. Fit the maglock to the L bracket using 2 Security Screws Item 1C.
- 6. Assemble (thread lock on 20,21,) both Z plates and the Armature plate as shown.
- 7. Close the door and use the Z plate to mark the door for drilling.
- 8. Fit the Armature assembly to the door.
- 9. Check that the Armature plate and mag lock are aligned.
- 10. Use rubber spacer washers (or use alternate Z bracket fixing positions) to ensure that the Armature plate and Mag Lock just touch.
- 11. Set the jumper to correct voltage, connect wiring and test. Replace cover plate.

Adjust the gap between lock and armature plate by adding /removing spacer washers Items 13 & 14
